

The high-tech folding bikes

eXXite

by FAYVOLT

The XS

The first Rayvolt and eXXite commercial **foldable bike.**

Oriented for the best performance, with its compact shape, 20" wheels, and all the eXXite technology, makes it the perfect bike for the urban daily commuter.

The removable seatpost battery gives the user more security in the city, allowing them to take it safely anywhere.

Original **Copper**

Shadow **Black**

British **Green**

The XXS

The smaller bike of the brand, and the **more compact** version of the XS.

With all the eXXite features in a 16" wheels shape, this bike becomes the perfect fit for the versatile commuter in the city.

The removable seatpost battery gives the user more security in the city, allowing them to take it safely anywhere.

Ultra light and ergonomical saddle

Integrated front and rear light made for the city

THE
TECH
**SMART
FEATURES**

The Seatpost Battery

The removable seatpost battery, one of the key features for the eXXite urban models, XS and XXS.

Made for the city, this new technology is the perfect match for the daily commuter. It allows the user to take the battery and saddle with them, reducing the risks of the city while parked on the street.

With its 36 Volts of power, this innovative system allows a more integrated look and a more lightweight solution.

Smart Features

Lever Regenerative Brake
with a proportional charge

Regenerative Back Pedaling
for proportional braking

Torque Sensor for a
smart acceleration

The EIVA™

The EIVA is Rayvolt's custom designed software which is used to control, customize, and monitor your bike*.

The EIVA computer can be mounted to the handlebars and is ready to go when you are. The app can be downloaded for use on an existing smartphone.

1. 360 Display

Monitor speed, battery state, MPH/ KM Run, bike status and adjust pedal assistance.

2. Bluetooth

Monitor the connection between the bike and EIVA®.

3. Driving modes

Select a predesign configuration.

4. Advanced Settings

Customize all the parameters of your bike.

5. Support

Direct contact our Support Team.

6. Music

Play your music, your way.

7. Maps

GPS access.

8. RegenFit

Recharge your batteries and train indoor.

REGENFIT The RegenFit™

RegenFit™ is a **smart feature and App** that allows the user to convert the pedal assisted bike into an indoor smart trainer.

By using the electromagnetic field of the motor, its hall sensors, plus the cadence and torque sensors, we can also recharge the battery.

Through the sensors, you can monitorize your training on the RegenFit mode available inside the EIVA App.

REGENFIT

The App

With the RegenFit™ mode inside the EIVA App 2.0, compatible with all eXXite e-bikes, the user can monitorize their trainings and customize their exercises routines while charging the battery.

The App features a custom training mode, where the user can modify the resistance applied to the motor to increase the difficulty and the charging speed of the battery. In the future, it will include different pre-defined workout routines and immersive experiences.

Keep the track of your trainings, see your advances and save energy by **charging the bike with your own power.**
